BA MULTIMEDIA
Calicut University,
2020-2023

BBA
MS University,
Ongoing

PROFESSIONAL SUMMARY

Passionate self-taught Flutter developer with strong Dart and Flutter skills, experienced in Android projects and Firebase. Proficient in JSON data handling, collaborative, and dedicated to staying updated on emerging technologies for mobile app development. Valuable addition to any team.

PROJECTS

QUIZ WEB APP | HARIS AND CO. | [GitHub](#)

Developed an Independence Day special quiz web app for Haris Co. using Flutter and Firebase. The app is designed to engage users with a series of themed quiz questions, providing a smooth and interactive experience. It features secure authentication, real-time scoring, and leaderboards, all powered by Firebase. This individual project showcases your expertise in Flutter for web development and Firebase integration for seamless data management.

Features:

- **Tech Stack:** Developed with Flutter and Firebase for real-time data
- **State Management :** Utilized Provider for efficient state management under the MVC architecture.
- **Real-Time Scoring :** Real-time scoring feedback implemented
- **User Authentication :** Secure user login and authentication with Firebase Auth.
- **Leaderboard:** Dynamic leaderboards to display top performers in real-time.
- **Functionlity Highlights:** Features include user-friendly interface, responsive design for web, and real-time data handling.

MINI PROJECTS

E-COMMERCE | [GITHUB](#)

- Application Built on Flutter With MVC Architecture and Provider.

WEATHER APP| [GITHUB](#)

- Developed using Flutter,Dart and weather API.
